

Web design customer: Leigh Interiors

Project Brief: We were contacted by Phil of Leigh Interiors, he had been messed about by a Rayleigh based company who use a pushy telesales team, followed by a sales rep visiting that promise the earth and then get their victims to sign an agreement with 9 pages of terms and conditions small print. This makes it very difficult to leave them and to be able to stop paying them, even if they have not kept their promises. Just like all the other customers who have contacted us after going with this particularly poor company, Phil's website was a half finished mess. The company who's name we cant reveal for legal reasons (S*f*T**h D****n), were making it very difficult to move away and were refusing to provide a copy of his website. In the end we opened a new hosting account for him for just £15 a year and rebuilt his website.

Customers Video Review / Testimonial Transcript: "Hi there im Phil Laurence from Leigh Interiors. I had a website designed by somebody in Rayleigh, they made a complete hash of it, I come along and I found Joe, who has absolutely transformed it, and done a lot of other things like click and buy stuff. And im very pleased with the work he has done, super helpful, I cant praise him enough, and it is one to one, person to person, which is what you need because you never know where you are going with a website. Thank you."
