

Web design customer: Len Forge Centre

Project Brief: We were contacted by Dan from The Len Forge Centre, they had a very old website that someone had done for them for free many years ago, but needed a professional website built. It needed to allow them to update their league tables regularly, as well as update and advertise upcoming team fixtures and match results. They wanted a booking system for the services that they offer. They also wanted to be able to update and edit the website themselves regularly and have a built in newsletter subscription system.

Customers Video Review / Testimonial Transcript: "My names Danny, im the FDO at the Len Forge Centre. We contacted the web design company about a website that we needed to be built, with different things that we needed to be added to it. Joe's been really helpful for us, anytime that we have needed to change anything or add anything he has been available for us to contact him 24/7, and the website that we have now got up and running is really good and really helpful for us. To, for instance be able to allow people to contact us via different email addresses and also for people to be able to book things online, and to use our centre as well."
