**SAFETY
QUALITY
EXPERIENCE**

CONSTRUCTION
Our teams have successfully performed all phases of transmission construction for numerous major utility companies nationwide.

EQUIPMENT RENTAL
We own and lease a robust specialized fleet of EHV transmission line equipment – well over 170 units.

The Maslonka management team can trace its ancestry back nearly four decades, to companies that built some of the most complex and ambitious power transmission projects in the western United States during the 1980s and '90s. This allows them to bring nearly a century of combined experience to every project they do, which has earned them a national reputation for safe, on time project completion, even in the most challenging working environments. Thanks, Maslonka Powerline Services for allowing SharpeSoft to share in your continuing success.
