Manuel Haulage Ltd – Tolaga Bay, NZ

We are a small family owned and run logging business in Tolaga Bay, and were lucky enough to find the folks at MyTrucking, who offered us a solution to our software woes.

Previously we used spread sheeting to track our trucks loading and performance on a daily basis, but this was always open to error, especially if the formula was accidentally altered /or worse deleted by an unfamiliar user. Once the staff at MyTrucking got us up and running and our software installed our productivity practically doubled (admin wise) and we found we were not so stressed trying to find extra hours to complete our work.

The software is user friendly, very easy to manoeuvre and if we needed help then we could either call the office or go onto live chat. No question was silly and we have full confidence going forward that this is the best solution (and home grown) to the health of our logging business.

Thank you MyTrucking staff, have a safe and happy Christmas. We look forward to next year whatever it may bring.

Raewyn Manuel
