Enkrypt AI

Technology Case Study (NetApp)
Safeguarding data that powers generative AI applications.

NetApp built an Intelligent Data Infrastructure to enable Gen AI apps on top of the data they store. NetApp partnered with Enkrypt AI to ensure data readiness for Gen AI and to remove data risks on their platform. NetApp customers can now build AI apps 80% faster. And those AI apps are safer, more secure, and compliant.

"Enkrypt AI has the unique ability to detect and remove data layer risks in AI deployments. And they do it with extremely high precision."

Arunkumar Gururanjan
VP, Data Science

NetApp

Challenge	Solution	Results
Help NetApp customers build safe AI apps on top of NetApp data	Ensure data readiness for Gen AI applications	Customer acceleration of safe AI apps in production
How to best secure NetApp's Intelligent Data Infrastructure that powers Gen AI apps.	Remove data and compliance risks from NetApp's infrastructure platform.	NetApp customers can build safer, more secure, and compliant gen AI apps. And they can build them 80% faster.
