

Case studies from our **customers**

PZ Sportwagenzentrum Osnabrück

Challenge:

We worked with a provider who only manually edited the backgrounds of our vehicle images. The floors remained original and we had to wait up to 24 hours for the finished pictures. It was clear to us that we were looking for a better service provider in the area of photography processes and image editing.

Successful implementation with **autofox**:

The decision to use autofox, with its 4K AI technology and immediately available images, paid off. Excellent value for money and fast support have improved our online presentation with high quality vehicle images and 3D showrooms. This led to an increase in sales and strengthened our brand representation, making autofox an indispensable partner for our Porsche Center.

- ✓ Images available in minutes
- ✓ 4K resolution for high image quality
- ✓ Direct integration into inventory management
- ✓ Shorter downtimes
