

Flanks for

Pension plan providers

Challenge

Pension transfers in the UK are still slow, manual, and error-prone. Providers chase fragmented data across formats like PDFs and messy CSVs, dealing with inconsistent fields, missing plan details and time-consuming reconciliation, all of which delay execution and increase risk.

How we help

[Aggregate](#) [Lume](#)

Flanks Aggregate automates the retrieval, cleaning, and standardisation of pension data, no matter the provider or format. We deliver structured, execution-ready data that fits your internal models and systems, accelerating onboarding, ensuring data quality, and reducing operational effort.

Benefits

- ✓ Eliminate manual data collection and provider chasing
- ✓ Receive pre-filled, structured pension data in your system format
- ✓ Improve data quality with validated, standardised inputs
- ✓ Accelerate onboarding and pension transfer consolidation
- ✓ Ensure compliance with secure, auditable data flows
