

# Petrofac Embarks on Cloud Transformation Strategy for IT Modernization

## The Client

Petrofac is a leading international service provider to the oil and gas production and processing industry. With over 37 years in the industry, 31 offices and 12,500 staff worldwide, Petrofac designs, builds, operates and maintains oil and gas facilities helping each of their clients transform the value of their assets across the oil and gas life cycle.

## The Challenge

Petrofac needed to modernize its business and with the mission-critical workloads that exist in the oil and gas industry, the service provider needed a seamless transition to the cloud.

## The Solution

Seamless migration -

- Migrate server workloads to Microsoft Azure from two main data centers in UK and UAE
- Microsoft System Center
- Microsoft Operations and Management suite
- Barracuda and StorSimple

## The Benefits

Smooth design and migration to Microsoft Azure platform.

“Inframon, an Ensono company, are the safest pair of hands in the UAE for us to entrust this business changing project to. Have the piece of mind that we are in a trusted pair of hands for both the design of our new Azure platform as well as the migration to it. ” - Guillaume Roux, Head of Technology and Implementation
