Printing New York is New York's #1 print store with locations in Manhatten and Brooklyn. Printing everything from brochures to flyers, business cards, to large format and boutique custom products.

This is one of the first major printing shop's to use WordPress/WooCommerce and features an entirely custom-built product customisation options on the front end allowing for up to 15 customisations per product (colors, uploading own designs, quantities etc) which all have unique pricing which compounds per quantity.

We use a custom version of WooCommerce Pricing Matrix plugin to create the dynamic pricing.
