Case Study

SandPro is locally owned and operated out of Berthold, ND. They are a solution-based company offering Wellhead & Sand Management Solutions for Oil & Gas Industry.

Expectations

When started looking for software the company knew exactly what they needed: invoicing, repairs, assets management, analytics. The biggest challenge was that most of the software was already set up and limited to what they can offer

Solution

All-in configuration of rental inventory management software for Sand Management, Wellhead, Frac Stacks rentals, and sales – from Purchasing to Dispatch to Sales Orders

Results

A scalable oilfield rental software customized to the specific needs of the company with ambitious growth plans
