Scan2CAD

Scan2CAD is the world's leading conversion software built for engineering and design, allowing you to convert your designs for CAD.

CAD (computer-aided design) software is commonly used by architects, engineers, drafters, artists, and others to create precision drawings or technical illustrations.

Starting out 20 years ago as a solution for converting architects' paper drawings to vector format, the Scan2CAD software is used in over 90 countries, and is the most accurate automatic vector conversion for CAD. Tellingly, they are trusted by some of the world's best design and engineering **companies** such as NASA, Nike, Boeing, and Intel.

"We've worked hard on building a beautiful end-to-end experience for our customers and WooCommerce made it so much easier to achieve."
– Scan2CAD

Saving customers valuable time previously spent manually tracing or outsourcing redrawing, the software supports over 30 file types (including almost any raster and vector file type) for 100% accuracy to your original designs; pixel for pixel, vector for vector, millimeter for millimeter.

High precision conversion settings allow customers to adjust any variable they wish. Text is also automatically converted to editable vector text via Optical Character Recognition (OCR), with powerful raster effects enabling you to clean your designs before conversion in just a few clicks – you have full control.

Converting thousands of designs is no problem either – batch conversion and automation features have been designed with speed and performance in mind, and can convert all files within a directory at optimum speed to save you countless hours.

The Scan2CAD site also has a great library of video tutorials to guide you along the way, even offering free weekly DXF packs for download. Using **WooCommerce Subscriptions**, customers are able to start or end their subscriptions to Scan2CAD whenever they wish – no contracts here.

EXTENSIONS USED

- **WooCommerce Google Analytics**
- **WooCommerce One Page Checkout**
- **PDF Invoices**
- **Checkout Field Editor**
- **URL Coupons by SkyVerge**
- **WooCommerce Subscriptions**
- **Sequential Order Numbers Pro**
- **Follow-Ups**
- **Stripe**
- **EU VAT Number**
