How Schuler Shoes cut their scheduling time in half

Schuler Shoes is a 100-year-old family-run shoe business that improves lives, one person, one pair, and one neighborhood at a time.

"When I Work allows the schedule to come to life and makes scheduling fun."

– Jim Dament, General Manager

Jim Dament is the General Manager at Schuler Shoes. Schuler Shoes is a leading shoe retailer in Minnesota with 9 locations and over 250 employees. Prior to using When I Work each of the 12 scheduling managers was spending 15-20 hours a week creating the schedule through Excel Spreadsheets. With a growing business, Jim knew he needed a better way to forecast labor needs and schedule further in advance. After implementing When I Work his managers have been able to cut their scheduling time in half. With the time they gained back, they have been able to focus on planning and hiring. The Assistant General Manager now is enjoying the scheduling process, "When I Work allows the schedule to come to life and makes scheduling fun."
