

The Sheepskin Factory- Denver, Colorado

The Sheepskin Factory has been through a lot over the last 4 years - in 2012 their business was affected by an arson motivated fire - but the owners pushed on. When the business re-opened they did so with an underwhelming WordPress website from an average provider that provided an "eCommerce WordPress Plugin". Fast forward to 2016 and The Sheepskin Factory called Denver Website Designs to help. In 6 weeks we redesigned and launched their new site, set up their highly functional eCommerce solution, revamped their social media pages and a whole lot more. Have a look at <http://sheepskinfactory.com/> new website.
