

CASE STUDY

Real-Time Visibility and Automated Compliance to Slash Policy Change Time

A leading global technology company specializing in accelerated computing, AI, and graphics processing, powering innovation across industries from gaming and healthcare to autonomous vehicles and scientific research.

Use Cases: Enforce Compliance, Manage Change, Reduce Risk

Industry: Technology

The Challenge

Slow, manual policy changes, time-consuming compliance checks, and limited visibility across platforms left their environment exposed to misconfigurations and security risks. The company sought to:

87%

Reduction in policy change turnaround time

20+

Manual steps eliminated from the policy change process

- Reduce time, effort, and resources required to manage the current firewall change process through intelligent policy automation and workflow management
- Eliminate complexity by providing centralized and consistent visibility of network security policies across the hybrid enterprise
- Proactively detect, alert, and track policy changes in real-time
- Provide flexible and granular assessment frameworks that allow for customizable compliance checks
- Continuously detect and remediate redundant, shadowed, unused, and overly permissive objects/rules

100%

**Compliance maintained
across PCI, ISO, SOX, and
GDPR**

The Solution

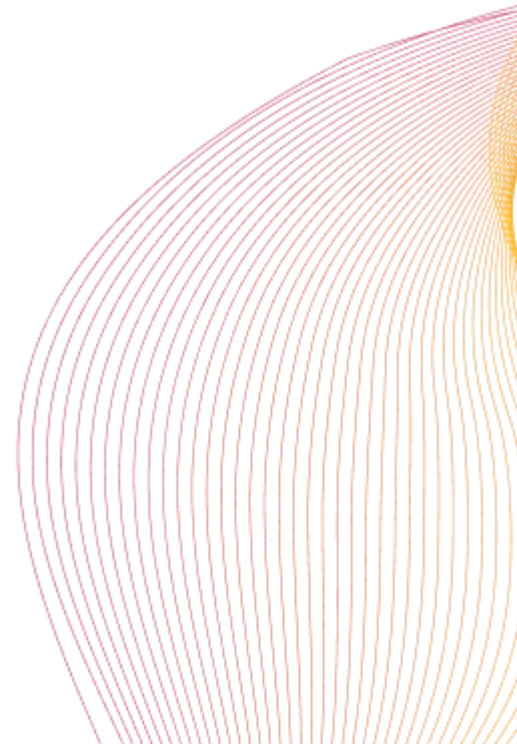

With FireMon's network security policy management solutions, the company gained a single source of truth across its hybrid environment. Automated workflows and compliance checks streamlined the change process while providing continuous adherence to PCI, ISO, SOX, and GDPR standards.

- Reduced policy change time from 8+ days to 1
- Eliminated manual compliance steps, saving significant time
- Achieved and maintained 100% PCI, ISO, SOX, and GDPR compliance
- 100% visibility and control across the entire firewall environment

Results

- 100% of rules automatically evaluated for compliance pre-deployment
- Hours of manual compliance work eliminated per engineer per week
- 100% real-time visibility into policy changes across hybrid environment

About FireMon

FireMon's mission is to improve security operations that will in turn lead to better security outcomes. FireMon delivers industry-leading security policy management, cloud security operations, and asset management solutions. Our platform is the only real-time solution that reduces firewall and cloud security policy-related risks, manages policy changes, and enforces compliance. FireMon's Cloud Defense (formerly DisruptOps) is the only distributed cloud security operations offering that detects and responds to issues in the fast-paced public cloud environments. Our cloud-based Asset Management solution (formerly Lumeta) scans entire infrastructures to identify everything in the environment and provide valuable insights into how it's all connected.
