

# A family law practice **cuts their tech costs by 5x** with Smokeball's comprehensive software

**5x** Savings on firm technology costs

**7** Software programs eliminated

**1** Comprehensive solution

Firm owner Bonnie Humphrey was in a “bad marriage” with legal software. Each system she tried came with its own headache, from inaccessible data to complicated workarounds. The firm’s software and apps ballooned—cobbled together by IT consultants. When the consultants informed Bonnie of a massive rate increase, she switched to Smokeball.

Now Humphrey Law has a comprehensive practice management software that streamlines their family law cases from client intake to billing. “Everything I need is in one place. Smokeball invests time and effort into creating software that actually makes legal professionals’ lives easier,” says Bonnie. As a result, Humphrey Law staff are more efficient, less stressed, and able to better guide clients through some of life’s most challenging times.

## A single cloud-based solution to simplify a ballooning legal tech stack

- **Client intake** jumpstarts cases and information gathering
- **Automatic time tracking** captures staff’s billable time and enables easy invoicing
- **Automated templates** power quick & accurate document creation

### Humphrey Law Office
