

TERRA DYNAMICS - ALGONA, WA

Tina Scoccolo grew up working with her father in heavy civil construction and erosion control, so it was no surprise when she purchased her first hydroseeder and started her own company in 1986. A SharpeSoft client since 2014, **Terra Dynamics** is now a nationally recognized leader in landscape construction, erosion control, wetland mitigation, planned communities, parks, and athletic fields. Over the last three decades the Algona, WA company's dedication to quality, performance and safety have made it one of the state's top woman-owned businesses, and Scoccolo is routinely asked to serve on official panels tasked with upgrading standards in the landscape construction industry. Thanks Tina, for choosing SharpeSoft!
