

THE VAN DYKE CORPORATION - 29 PALMS, CA

Here's a warm welcome to [The Van Dyke Corporation](#), whose recent purchase of SharpeSoft Estimator has made it the newest member of our growing family of clients and friends. The 29 Palms, CA company specializes in underground utilities, pipeline work, sewer and storm drain systems and septic tank installation. The firm was founded by Homer Van Dyke in 1959 but son David has been at the helm since 1978, making it a go to name for construction services throughout southern California. We look forward to working with Van Dyke Corp as they continue to build on their 58-year tradition of quality and service.
