The Better Home Company provide a full range of expert home services.

The company have now launched their extensive **Home Emergency Cover** plans after decades of experience in building and maintaining homes in London. Customers are protected against boiler breakdowns, burst pipes, blocked drains, faulty electrics, leaking roofs, broken locks, and even pests.

The Better Home Company “are proud to offer the highest limits of repair cover, the fastest response times, and the friendliest customer service.”

“We do things differently by doing them much better.”

“There was a WordPress website already built for the home services side of the business, but this didn’t allow for the sale of products” says Stephen White of London development agency, Spaced Digital. “This meant that WooCommerce had to be integrated into the current build.”

“All payments are collected via direct debit, so **GoCardless** was used as the payment gateway. [We used] WooCommerce Subscriptions...to ensure that payments will continue to be taken for paying customers year after year without any additional effort.”

Customers can also choose whether they prefer direct debits to come off their account monthly or annually.
