

# The WonderBar

Website Design, Website Development

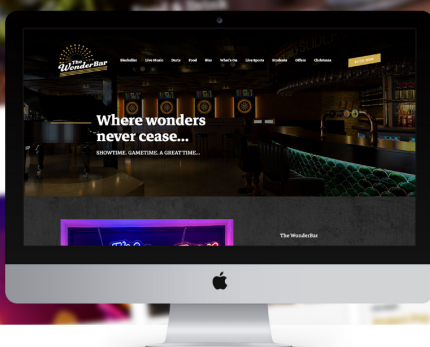

"Thrive have exceeded our expectations in the design and development of our new website. They listened to each and every request from the original brief right through to launching the site and nothing was ever too much trouble. We saw results from day one of the site going live and I look forward to continuing working with them on more projects in the future."

Emma Hill, The WonderBar

In recent years we've worked with the team at Ramside Estates, owners of The WonderBar, to produce quality marketing and website products. The WonderBar was a project with a difference, allowing the company to renovate their existing bars, Beyond and Opera Piano Bar, into the new-look The WonderBar. Promising to be an exciting mix of activities, bierkeller and entertainment, The WonderBar's website is a one-stop-shop for offers, event information and opportunities to engage with all that is "wonderful" about WonderBar.

## An exciting future...

The new website really sets the tone for an exciting future for this new bar in the heart of Newcastle. We continue to support Ramside Estates with a mix of their hotel and hospitality businesses, but it's been truly exciting to work collaboratively on bringing The WonderBar to the Newcastle nightlife scene.
