acceldata

Top Telco in Indonesia

Acceldata enabled a top 3 telco improve data quality, eliminate wasteful data costs, and speed performance, fixed broken data processes, freed-up additional capacity, accelerated both data product delivery and cloud migration

Problem

Needed better visibility and improved data quality for critical data pipelines serving their customer offers and uplift models.

Solution

Data Observability across HDP, CDP, ODP and Cloud Data environments with reconciliation and drift checks across all their complex pipelines.

Results

Stable architecture with resilient data operations that accelerated migration to cloud while maintaining performance of existing Hadoop environment

Observing

⊘ Pipelines   ⊘ Data

⊘ Infrastructure   ⊘ Cost

⬤ Users

>50 Billion

Quality Checks under 2 Hrs. Over a billion rows verified for 50 critical data quality rules in under 2 hours

9 Petabytes

of stagnant data identified and eliminated in under 2 weeks, reducing storage consumption and costs.

$350k

in hard cost savings achieved in under 2 weeks
