

## Rail and public transport

### Crossrail 2: getting public input on a contentious scheme

Crossrail 2 used Citizen Space for all their digital consultations on the major rail project. As you'd expect with such a huge development (~£30bn), this involved multiple large surveys over several years – with individual consultations receiving 20,000+ responses.

Other rail and transport projects using our tools include:

- Bakerloo line extension, Transport for London, UK
- Piccadilly Line improvements, Transport for London, UK
- Anglia Level Crossing Proposals, Network Rail, UK
- Transport Scotland's rail infrastructure strategy
- West Midlands Interchange, UK
- Hackney Transport Strategy, UK
- Feasibility for a Freight Consolidation Centre in Belfast

---

“The team at Delib are a delight to work with. Their support team have been a huge help, particularly in ensuring our Citizen Space is able to cope with intense activity and large response rates.”

- Head of Consultation, Transport for London
