Learn how TruckLogics helped an owner-operator manage FTL and LTL loads with the right technology

Challenge:

An owner-operator in the trucking business had a hard time tracking and scheduling LTL and FTL loads.

TruckLogics' Solution:

- ⊗ The Dispatch Management feature offered by TruckLogics helped in scheduling LTL and FTL loads.
- ⊗ Create a single load for a dispatch with **Full Truck Load (FTL)**.
- ⊗ Add multiple loads to a single dispatch and generate separate invoices and BOLs for each client's load, with **Less Than TruckLoad (LTL)**.

Result:

The Dispatch Management feature made a significant change to the owner operator's business and increased its cash flow.

TruckLogics helped to bring in 10x productivity for our trucking business with its seamless dispatch system. We appreciate their efforts in managing our dispatches in a simple yet productive approach.

- Robin, **Owner Operator**
