# UAE Government Chooses Creately for Scalable, Secure Visual Collaboration

The Government of the UAE selected Creately as their preferred platform for diagramming and data management across departments, recognizing its ability to support both technical and strategic collaboration needs.

## Why choose Creately?

One of the UAE government's key requirements was strict data residency, necessitating local hosting within the UAE. Creately met this requirement with in-region data hosting, alongside a flexible pricing and rollout model tailored to their phased adoption strategy.

## What this means for users:

- Enterprise-grade diagramming and data management tools.
- UAE-hosted data infrastructure to ensure compliance and security.
- A phased rollout plan enabling smooth adoption and organization-wide scalability.
