

Enhanced ERP Functionality with Automated Solution for Winery Industry

Industry: Winery

Modules:

- Finance - (AP, AR, GL, FA JC, AB)
- Distribution

US-based wine producer and seller. The client is totally estate-based with their vineyard portfolio with approx. 10000 + hectares and increasing.. The client makes everything in small lots from separate blocks and use traditional winemaking techniques. Almost 80-85% of the wines are barrel fermented or aged, which is a very high proportion for this size of company. As of 2010, the client was the highest selling brand of "super-premium" wine in the United States.

Client looking for a partner who can help them with implementation of latest JD Edwards applications for their winery business. From customizing the enterprise solution to suit clients need to ensuring automation of business processes. Cyret Engaged with client in December 2010, for VAT, purchase order automation, and accounts payable automation solution under its JD Edwards EnterpriseOne 9.0 application.
