

Client testimonials

VT Transport – Auckland, NZ

MyTrucking has helped Auckland-based VT Transport Ltd grow by over 300% in just six years, going from 15-20 trucks to now having 68.

Pana says the transport management software gave his business a competitive advantage, helping him be agile and secure new clients. Being able to capture and store Proof of Delivery (POD) and email it to customers quickly, if needed, provided a valuable point of difference.

“Customers want good communication and record keeping, which is what MyTrucking delivers.”

This has stood VT Transport Ltd in good stead when applying for tenders, which place high emphasis on dispatch systems, ability to keep accurate records and being able to communicate quickly. He also values the reporting function in MyTrucking.

“The reports we can generate are awesome. With MyTrucking being linked to EROAD, we can get a breakdown of income by kilometre per hour for each truck. It tells us straight away the profitability of that truck. It allows us to dig deeper and fix any problem.”

“The next step all our customers were screaming for was the customer portal, which MyTrucking has delivered. It looks really good. I’ve got my two main customers on it, and they are loving it.

“Having photos and signed copies of POD available straight away after a job is done is fantastic. I also like the idea of being able to choose what you want the customer to see in the portal.”
