A SharpeSoft client since 1997, Western Engineering offers complete pre-construction services, with an emphasis on mass grading, utility installation, and paving. Under the leadership of company President, Don. J. Carrol, Western Engineering provides top-level service to public works agencies, school districts and commercial and retail developers throughout northern California.

The company uses a full service, full commitment approach, performing nearly every aspect of the job in house with their own labor and equipment. Because of this, over 70 percent of their business comes from repeat customers.

SharpeSoft is proud to be part of the Western Engineering success story.
