Transforming
Intranet Infrastructure
for a Leading
ECM Services Provider

Established in 1987, New Jersey, our customer is a leading IT services and consulting organization providing enterprise content management (ECM) services to clients worldwide. The organization specializes in storing and protecting documents and records for various industries. More than 200 employees spread across three different locations leverage a SharePoint based Intranet to collaborate, communicate, and deliver solutions to clients.

Existing Infrastructure creating Collaboration Bottlenecks

However, the existing Intranet was built on a legacy SharePoint on-premises version. The Intranet being used lacked various new functionalities available in SharePoint 2019 and SharePoint Online. Such shortcomings created bottlenecks in collaboration. If not mitigated on time this could impact the efficiency of the organization.

The IT management team of the ECM provider was keen on collaborating with a technology partner to get an actionable roadmap to modernize its existing Intranet and enable better collaboration across departments and teams.

As a Global Systems Integrator and Microsoft Solutions Partner, AgreeYa has decades of experience in modernizing Intranets and underlying infrastructure. Our proven track-record made us an immediate choice for the customer

"Facing rapid expansion, our legacy infrastructure had become overwhelming. AgreeYa stepped in as our strategic partner and streamlined our IT ecosystem for seamless growth, security, and operational excellence."

- IT Director, ECM Provider

Creating a Roadmap for Modernizing Intranet Infrastructure

Upon engagement, our team conducted thorough assessment of the customer's existing IT infrastructure. Our experts held in-depth discussions with key stakeholders to understand the exact expectations. Such sessions made it apparent that the customer wanted to create a new SharePoint infrastructure based on Windows 2022. To support this goal, AgreeYa helped the customer with the following:

SQL 2016 Database Migration to SQL 2019/SQL 2022: Our team executed a seamless migration of the customer's SQL database, transitioning from SQL 2016 to the latest SQL 2019/SQL 2022, ensuring data continuity and system compatibility.

SharePoint Administration/Configuration: The team meticulously administered and configured the SharePoint environment, optimizing it to align with the modern infrastructure requirements, enhancing performance and collaboration capabilities.

IT Infrastructure Administration: AgreeYa provided comprehensive IT infrastructure administration, streamlining system operations, and ensuring a robust, reliable foundation for the new SharePoint environment, paving the way for a successful modernization.

In addition, AgreeYa team meticulously reconfigured the customer's existing SharePoint Portal, ensuring that custom-built solutions deliver enhanced user interfaces, simplify collaboration and users can seamlessly transition to the new infrastructure. This was achieved with zero data loss or impact on business operations, emphasizing our commitment to maintaining business continuity throughout the migration process.

Transforming Collaboration with Data Migration and Enhanced User Experience

Our expertise and experience helped us in migrating the Intranet infrastructure easily while transforming collaboration across the organization. Our goal was to accelerate productivity and enhance collaboration within the organization. AgreeYa experts migrated their SharePoint Intranet infrastructure to the latest version of database and Windows 2022 without any issues and enhanced their overall user experience. Some of the project benefits include:

Significant reduction in operational costs with decreased maintenance.

Zero loss of data while migrating from old to new infrastructure.

Zero security risks or incidents.

1X increase in the overall productivity within the organization.

2X increase in Intranet adoption and enhanced collaboration.

Technology Stack

"Our users were facing various issues with the existing infrastructure. AgreeYa helped us migrate to a recent version of Windows and hardware without any issues. Collaboration challenges are now a thing of the past for us."
