

# Albéa: producing the statutory consolidation and the group reporting in the Nell'Armonia private cloud

## In short

Albéa is a recognized leader on the, in fast evolution and full expansion, highly competitive market of cosmetic products wrappings. Prestigious brands from all over the world use the services of this internationally enterprise whose the historical headquarters are located at Gennevilliers. At Albéa, the beauty meets the technological and industrial performance.

## Context and challenges

Albéa chose the Oracle Hyperion Financial Management (HFM) solution, firstly externally hosted, for the consolidation and the controlling.

After a few operation times, Albéa has been confronted to performance and reactivity issues of the management plateforme. Besides, Albéa was looking for a solution enabling it to reduce its running and implementation costs of future evolutions that will occur on the financial management plateforme.

In an international and high volumetric (more than 150 users) context, Albéa has requested Nell'Armonia to optimize performance and to enhance the service and support quality.

## Nell'Armonia's answer

In 2013, Albéa has chosen to outsource the production of its statutory consolidation and management reporting into Nell'Cloud, the Nell'Armonia private cloud.

Nell'Armonia thus ensures the hosting and technical and functional maintenance of the Albéa group financial management plateforme. Nell'Cloud teams ensure support to users (Europe, America, Asia).

Futhermore, recurring functional actions are ensured by Nell'Cloud teams who are monthly charged to open processes to users, make available copies or necessary data simulation according to the reporting schedule defined by Albéa.

## Benefits

- Improved services level and quality.
- Technical and functional knowledges are shared and documented. Albéa has **the right expertise at the right time** (no more issues in case of internal resources departure, no more organisational tensions during holiday period...).
- Availability rate of 99.9999%.
