

ANDA and DMF Filing Solution for a Pharma Client

About the client: The client is a fast-growing Indian pharmaceutical company with a global presence. It develops, manufactures, and markets a broad range of pharmaceutical products along with a variety of in-house products.

Business requirements: Drug-related information was shared with the regulatory and marketing stakeholders in the form of Excel sheets and the related documents as attachments in emails. The client lacked a centralized repository for information and hence, could not monitor the progress of various processes. Forecasting was not possible because data was not in a structured form. The client's Sales department lacked insight into the existing data; gaining access to this information was also a huge problem.

Solution: Cybage developed a fully integrated responsive portal with drug-related information, providing real-time and dynamic data to the concerned stakeholders. This portal targeted tablets and iPads and provided access to all the sales and management executives, even during their scheduled sales travels.

Tools and technologies: MS SharePoint 2013, Knockout JS, SQL Server 2008 R2, jQuery
