

Success Story

Another

Another provides E-money solutions for individuals and businesses through prepaid Cards (single and multi-load), Payroll Cards, FX, and acquiring and payment solutions for businesses.

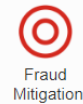

Client: Another

Visit [their website](#)

Sector: Pre-Paid Card Technology

GPS Solutions:

“Great work provided by the GPS Implementation Team establishing connectivity to the systems and helping us to ensure our products and services were configured correctly and implemented in a timely manner.”

Christian Russell

Managing Director at Another

Another provides a range of e-money products and services for both individuals and businesses, including the next generation of prepaid cards, featuring UK sort codes, account numbers and IBANs, made possible through partnership with Global Processing Services (GPS) and Cashflows.

Cardholders can use their card to make purchases, bank transfers and have their salary paid directly to their card.

Cardholders also benefit from having access to an online account with a dedicated mobile app that allows users to pay for goods at any merchant using Peer-to-Peer messaging and device-to-device transfer, ensuring its users can make fast and secure card payments from the convenience of their phone.

Users will have access to different levels of travel prepaid card solutions, manage and view transactions on the dedicated mobile App Pay, make purchases in multi-currencies and pay via their mobile phone.

For its clients seeking competitive exchange rates, Another offers a card base currency which is available in any of the 14 currencies allowing users to secure the exchange rate before they travel and avoid the usual rates traditional providers of currency exchange apply which can go up to 7% and with some financial institutions adding even 2.99% on non-domestic transactions.
