ARMOR

CASE STUDY

Cloud Based Travel Operator

Transitioning to cloud-based operations required a comprehensive cybersecurity solution to protect sensitive data and streamline management.

Business Challenge

Prior to its transition to cloud-based operations, cybersecurity support was being provided to the company through the implementation of the Armor Agent for Server host-based agent.

Whilst the Armor Agent for Server solution provided the company with a range of effective workload security capabilities, including host-based IDS/IPS, FIM, malware protection, vulnerability scanning, antivirus and log management with unified management and visibility, an updated solution was necessary to fully leverage the capabilities of the native Azure environment post-transition and provide a holistic, easy to manage view of the company's entire IT estate.

Armor Difference

Armor and 3Cloud delivered a consolidated Azure cloud management and cybersecurity solution, leveraging Armor's adaptive MDR and 3Cloud's Managed Platform service. This collaboration provided:

- Active Threat Detection and Response
- Advanced Analytics and Automation
- Unified Security Framework
- Continuous Protection

ARMOR

The Solution

Active Threat Detection and Response

Real-time monitoring and rapid action against cyber threats.

Unified Security Framework

Intergration of Armor Agent for Server, CrowdStrike, and Defender for a holistic view.

Advanced Analytics and Automation

Enhanced threat intelligence and incident management.

Continuous Protection

Ensuring the integrity and security of critical assets.

ABOUT ARMOR

Armor, a global cybersecurity leader, provides comprehensive managed detection and response (MDR) and compliant cloud solutions. By combining advanced technology with expert services, Armor protects businesses from cyber threats, mitigates their risk, and ensures regulatory compliance. Dedicated to innovation and excellence, Armor is trusted by thousands of customers worldwide.

The company is headquartered in Dallas, Texas, and has offices in the United States and Singapore.
