

“ Collaborating with Triantz has been profitable for us both in business as well as partnership terms. Kudos to the team! ”

Senior Director – Service Delivery
Leading logistics provider

MY PROBLEM

Needed to utilize asset management function to its fullest potential, in addition to creating software compliance results and implement industry best practices for Software Asset Management (SAM).

SIMPLY SOLVED

Triantz not only reduced the high levels of customization in our asset management process, but also captured in-depth details of critical assets, helped us identify software contract information sources, and enabled proactive SAM. The bonus was it conducting periodic workshops on software/ hardware asset management with our IT and business teams!
