

**PROVE IT.**

## **2017 BY THE NUMBERS**

One of the top 5 hospitals in the United States  
experienced this with Asurint:

**1.69**  
DAY TAT  
on verifications

**0.37**  
DAY TAT  
on criminal

**98%**  
VERIFIED  
RATE

**16.5%**  
**HIT**  
RATE

## CASE STUDY

One of the top 5 hospitals in the United States was missing the opportunity to place qualified candidates due to the state fingerprinting process taking 30+ days to complete. The hospital decided to test Asurint on two dozen difficult cases that they had over previous years.

FINGERPRINTING  
PROCESS TAKES

**30+**  
**DAYS**

## RESULTS

Not only was Asurint able to return the reports within a couple of days, we were able to provide cases and records not previously found with fingerprinting alone. At the end of the day, Asurint solved the problem of the hospital missing qualified candidates by providing more complete records in a fraction of the time.
