

## FLATWORLD SOLUTIONS PROVIDED AUTOCAD CONVERSION SERVICES TO A PROMINENT INTERIOR DESIGN FIRM

*Find out how the expert team at FWS helped an award-winning California-based interior design company with AutoCAD conversion services.*

### The Client

The company, originally headquartered in California, US, has a pan-America presence and has won accolades for its excellent interior design solution. The client has over 500 designers who work tirelessly to improve the client's brand.

### Client's Requirements and Challenges

The customer wanted to outsource AutoCAD conversion services and was looking for a reputed company who had prior experience working in the same domain. As FWS works with multiple partners across the USA, the client approached us with their unique requirement of scene rendering. They had some 1000 furniture for which they wanted scene rendering through CAD.

### FWS' Solution

The client sent sample furniture images and instructed us to work on the background and change as per their requirements. Our team started with the visualization of the furniture background. Next, they placed furniture perfectly and adjusted the color, texture, and lighting to suit the client's set up of design.

The team successfully created the model and forwarded the scene rendering and later adjusted as per the client's feedback. In a short span of time, our team of CAD designers was able to finish the project.

### The Results

We sent the AutoCAD file sooner than the client's expectations. The customer was content with our on-time delivery and extended the project by outsourcing other CAD conversion and design services.

### Outsource AutoCAD Conversion Services to Flatworld Solutions

Flatworld Solutions has emerged as a prominent provider of [3D furniture modeling services](#), [BIM](#), and many other [architectural services](#) to clients across the globe. Other CAD services in which we excel include CAD migration, 3D rendering, 3D animation, etc.
