

“ The team from Trianz went above and beyond to generate additional revenue sources for us, apart from fulfilling our original ask. This is something we’re extremely appreciative of, and we look forward to associating with Trianz repeatedly. ”

**Director of Data Management**  
Global Storage Systems and Data  
Management Company

#### MY PROBLEM

Our legacy DW platform was unable to process data volume as high as 1TB per week and could not provide real-time analytics. This lack of insights was limiting our opportunities to cross-sell and upsell services.

#### SIMPLY SOLVED:

Trianz simplified the consumption of data across the enterprise and also ensured uninterrupted business operations, improved product supportability, and elevated customer service. Making the opportunity to monetize data available by cross-selling and upselling services was a bonus!
