

## CASE STUDY

### BillGo, a Fintech Company, Uses BitRaser To Wipe Their IT Devices and Stay Compliant.

Colorado-based company BillGo develops real-time bill management & payments platforms for Banks, Fintech Companies & Billers. The company serves thousands of clients, and its platform is used by over 30 million consumers.

#### Business Need

BillGo approached BitRaser to perform secure wiping of their IT Assets. They had the following requirement:

- 1. Wipe Using DoD Standard:** BillGo wanted a data wipe software that could wipe different types of devices using the DoD 5220.22-M erasure standard.
- 2. Erasure Reports:** The Company wanted a record of destruction in the form of tamper-proof certificates and data erasure reports.
- 3. Fulfill Compliance Requirements:** BillGo had multiple compliances to adhere to as they provide financial services. Therefore, they required a one-stop solution that could help them comply with various regulations.

#### Solution

The BitRaser team recommended BitRaser Drive Eraser software to BillGo after carefully understanding their needs. The drive eraser is the best-in-class solution for wiping all drives and devices using the DoD 5220.22-M standard. It was also the perfect fit as the software generates automatic reports & certificates of erasure that are saved in a centralized cloud repository for easy access.

"Amazing! BitRaser has saved us time and money. It's easy to use and does exactly what we need. As we deal with sensitive data we needed a robust tool to securely wipe data from HDDs & SSDs. We researched and came to BitRaser which turned out to be the cost effective solution for us."

**Alfred Copeland , IT Support**

#### Client

✓ BillGo

#### Business Need

- ✓ Data wiping using DoD 5220.22-M standard
- ✓ Secure Erasure Reports
- ✓ Finance industry standards-compliant software

## BitRaser Benefits

- 1. **Supports Wiping of Multiple Device Types:** BitRaser can wipe drives like HDD, SSD, NVMe, SCSI, SAS, etc., using the DoD 5220.22-M standard efficiently.
- 2. **Helps Attain Compliance:** BitRaser is a tested and approved software that can permanently erase data and provide erasure reports that help organizations achieve compliance with financial and data privacy regulations.
- 3. **Generates Tamper Proof Reports:** BillGo found it convenient to access tamper-proof reports and certificates from anywhere and at any time. BillGo could create user profiles like an auditor with access to erasure reports for streamlining audits.

JAN, 2023

### Challenges

BillGo required robust software that could wipe multiple device types using the DoD 5220.22-M data wiping standard. They wanted erasure reporting for compliance and audit purposes.

### Solution

BitRaser Drive Eraser

### Benefits

HDDs and SSDs can be erased using BitRaser Drive Eraser. The software provides centralized access to tamper-proof reports and certificates of erasure that helps meet compliance requirements.
