

CASE STUDY

RepowerIT Streamlines Reporting & Wipes Various Device Types Using BitRaser

RepowerIT provides IT asset disposal & buyback solutions to large organizations across the United States. The company's turnkey solutions cover the entire process of equipment decommissioning, logistics, data erasure, hard drive shredding, and refurbishment for resale.

Business Need

RepowerIT approached BitRaser with the following needs:

- 1. Wipe Multiple Drive Types:** RepowerIT sought a unified solution to wipe different media devices.
- 2. Tracking & Reporting:** The Company wanted easy-to-manage tracking and reporting of their erased devices.
- 3. Customizable Reports:** Reporting with BitRaser enabled them to provide customized reports to their customers.

Challenges

The company had tried multiple data-wiping solutions depending on the media type to be erased. They needed a one-stop data erasure that could easily help them with different drives and devices. The company also had concerns with tracking and reporting erased assets using the previous solutions. RepowerIT couldn't provide customized reporting to their vendors, as some preferred receiving individual PDF erasure certificates or a .csv file with erasure logs.

Solution

BitRaser's team understood the requirements of RepowerIT & suggested BitRaser Drive Eraser software, a one-stop solution to wipe all kinds of drives and devices irrespective of the hardware.

repowerIT

"Our experience with BitRaser has been positive overall. A learning curve is to be expected in the beginning, however we experimented with a number of other erasure solutions & found the learning curve with BitRaser to be less than that presented by other solutions."

Glen Montgomery, CEO

Client

✓ RepowerIT

Business Need

- ✓ Single wiping solution
- ✓ Easy tracking & reporting
- ✓ Customizable reports

BitRaser Benefits

- 1. **Multiple Device Wiping:** Using BitRaser RepowerIT can now wipe any storage device like HDD, SSD, NVMe, SCSI, SAS, etc., with a single software, helping them be more efficient.
- 2. **Central Repository of Reports:** Anytime, anywhere access to all erasure reports added to their convenience. The advantage of creating new users with limited access, simplifying remote audits, and maintaining a secure chain of custody was highly appreciable.
- 3. **ISO Customization:** BitRaser offered ISO customization with options to do hardware diagnostics, select erasure methods, add custom fields, imprint the company logo, etc.

JAN, 2023

Challenges

RepowerIT required a single solution that could wipe multiple types of media devices. They were also facing difficulties in tracking and reporting their erased assets.

Solution

BitRaser Drive Eraser

Benefits

BitRaser Drive Eraser can wipe multiple device types with ease. The erasure reports are customizable and can be centrally accessed for easy tracking and auditing.
