MODULAR

CABI

> We've worked with Modular for several years on multiple projects. They have provided us with thoroughly professional, reliable advice, and development, that has stood the test of time.

Chris Parker - IT Development Manager, CABI

We collaborate with CABI on projects large and small, offering consultancy, UX/UI, design and build, to deliver great new digital products and services.

Working with product development, marketing and on various campaigns, we've created a whole host of products from websites, apps and animations, to interactive prototypes, pattern libraries and databases.

Flexibility is key when integrating with CABI's internal technical teams. Tech agnostic, we dovetail with established systems and processes; develop new ones when required.
