

## Case Study

# Calix

We co-created a new network architecture to better support Calix.

### At a Glance

Simplus/Infosys worked on an Advanced Edge Router co-creation with Calix on the AXOS platform.

### Services Provided

Implementation Services

## The Challenge

Background: The software-centric network architecture Infosys implemented dramatically simplified the network and its operations for Calix.

### About Calix

Calix, Inc. (NYSE: CALX) – Innovative communications service providers rely on Calix platforms to help them master and monetize the complex infrastructure between their subscribers and the cloud. Calix is the leading global provider of the cloud and software platforms, systems, and services required to deliver the unified access network and smart premises of tomorrow. Our platforms and services help our customers build next generation networks by embracing a DevOps operating model, optimize the subscriber experience by leveraging big data analytics and turn the complexity of the smart home and business into new revenue streams.
