# Caregiversdirect Case Study

## Case Study

### Caregiversdirects

This is a site for the care givers and care seekers who can register themselves, where the care seekers can find their care givers with detailed profiles, background checks, references and reviews, which make the process easy and safe.

**Industry:** Healthcare

**Technology Used:** Joomla2.5

Care seeker has option to Post jobs on different location and She/He can find the caregiver near to their location. Care givers can add background verified certification to their portfolio by paying the amount to Admin. Care givers can add services to their profiles, update their available date and time availability Calendar. Care seeker can upgrade subscription by using Paypal payment pro method

### Challenge

We had to design and develop a website where careseekers and caregivers can meet and get mutually benefited. The caregivers should be able to view all the careseekers within 50 miles. The job post should be categorically listed for easy browsing. The careseekers should be able to message to the caregivers and vice versa.

### Solution

The caregiversdirect website was designed and developed such that careseekers could find the jobs within 50 miles. The careseekers can register with free, premium, or standard mode. They can save the profile of the caregivers. They can also send messages to caregivers. Careseekers can see the background check of the caregivers and verify with the certification.

Caregivers can register with the site for free. They can get the background verification, certification and Motor vehicle check from the administrator. They can choose the service type such as home care, health service, therapist etc. They can also provide experience details along with details of rate for the service. They can also message directly to the careseekers. Caregivers can apply for a job or can choose for a short notice job depending upon their service.

HIGHLIGHTS
<b>Challenge:</b> <ul style="list-style-type: none"><li>1. User subscription with payment gateway.</li><li>2. Get Nearby zipcode.</li><li>3. Automatic City generation.</li></ul>

4. Facebook/Twitter Signup .

**Solution:**

1. Akeeba Subscription which offers the users registration with payment gateway.
2. We used geoinfo API to get the nearby zipcodes.
3. We used google API to get the city name by zipcode.
4. We used Slogin component for Facebook / Twiter Signup

**Benefits**

The key benefits upon implementation of Caregiversdirects

1. Caregivers can find the jobs near to their location and he/she will get alert about short notice jobs
2. Care seeker can Post jobs on different location.
3. Care seeker can find the caregivers by location,Job type,Certification,Service type
4. Care seeker can save the caregivers into their profile.
5. Using System messages module, admin can sent messages to registered user.
