

## CHECKED IN

Checked In is the perfect hospital management system that you need for a perfect medical institution.

### Smart Solution For Hospital Management

The patient has the ability to log in and look into his files, track medicinal schedules and even look into future appointments to keep track of his own health. All in all, Checked In allows the user and the hospital management authorities to keep complete medical record of the patient without any hassle whatsoever.

### Simple Yet Powerful List Of Functionalities

Checked in is not an ordinary restaurant application, it's so much more. The application is home to a spectacular set of features which enables it to stand out against several different competitors on both iOS and Android

## Launching The Application

Think you have an idea for a world-class App? We're all ears! Our app design and development architects love to listen to your ideas and to transform them into a functional reality. We're just a phone call away from making your app idea a digital success. With your app in hand, we aim to create excellent solutions. Get yourself the best App development services in town with CMOLDS and make your app a success.

### iOS

Key Screens

The world is entering a new era driven by digital platforms and mobile is key to not getting left behind.
