

Global Leader in Chemical Manufacturing Benefits through Microexcel's BI Solution

About the Client

The client is a world leader in Chemical Manufacturing.

Business Case

The client has global operations and had acquired lot of profitable business in the last decade. As a part of these acquisitions, it has recently acquired one of the largest manufacturer in Europe and its subsidiaries in multiple geographies.

The client is currently running its business operations on SAP and the acquired business also runs business on SAP. With the recent acquisition they have decided to integrate the IT systems for better visibility and tracking of financials across the globe.

Business Need

The most important business needs are listed below:

- To integrate the acquired business using IT transformation and integration program.
- To roll-out the integration foot-print in 4 continents i.e. Europe, North America, Latin America and Asia involving a total of 19 countries.
- Design a common reporting solution across the globe, while retaining a minimal local flavor.
- Reporting solution to cover the business processes of Order to Cash and Accounts Receivable.

The key limitations of the existing system included:

1. Non-existent BI strategy and roadmap
2. Silo'ed reporting solutions
3. High cost of ownership
4. High redundancies
5. High time to market

Global Leader in Chemical Manufacturing Benefits through Microexcel's BI Solution

These limitations lead to a very weak business information framework implementation which does not support exploiting the information available and using it for strategic business growth. The client needed a partner who could build an integrated, consistent and structured information repository to enable business transformation and exploitation of knowledge while at the same time work hand-in-hand with the delivery management in leading this very strategic and highly visible initiative for the client in setting the direction for the program thereby providing input to the BI strategy and also managing delivery at the operational level.

Solution

- The global template solution covers more than 75% of the reporting requirements coming from the various lead markets and thus enforces standardized reporting process across the globe.
- While the objective of any BI system is to have single source of truth, it's all the more critical to ensure that the reporting processes across the globe are common and business KPIs are the same.
- Implemented Supply chain, Finance, PM and QM Modules and delivered the reports in SAP BI and further integrated to BO's to meet business needs. measures required to implement the functionality
- Implemented dashboard, Crystal reports, Web I reports for the users.

Testimonial

"We now have a consistent, common reporting system and structured information repository of our operations across the globe which is very important for our strategic business growth. Microexcel has proved once again that is really a trusted technology partner"

- Vice President, IT Global Operations
