

“ Partnering with Trianz has been very fruitful for us. The team took care of everything – from establishing a roadmap to structuring a ROI model. ”

Director

Global insurance company

MY PROBLEM

We needed to migrate the majority (~70%) of our business applications and infrastructure workloads to the public cloud.

SIMPLY SOLVED

Trianz deployed a unique model for execution where agile teams worked in parallel with business leads and IT managers to craft a cloud reference architecture, a financial framework, and a roadmap aligned with business goals. Trianz' proprietary TCO Calculator and an accelerated migration planning methodology were also leveraged to this end.
