❝ Our partnership with Trianz has proved to be an astute decision. From designing and developing a solution to migrate volumes of historical data to creating an auditable, unified, scalable platform, Trianz has consistently demonstrated in-depth knowledge and expertise. ❞

Director of Information & Data Management
Large Property and Casualty Insurance Company in US

MY PROBLEM

We needed to move 30 years of data from a newly acquired business' multiple heterogeneous systems to a unified scalable platform within a schedule before the original systems were shut down.

SIMPLY SOLVED

Trianz made a unified and scalable data model available for predictive analytics, and also ensured all types of user needs were met by a centralized reporting architecture and ongoing business needs continued unhindered.
