

“ Working with Trianz has been an enriching experience. Especially their modus operandi of enabling flexible authentication, real-time auditing and monitoring including audit trails. Undoubtedly one of our most productive associations. ”

Director of Product Development

A Leading Provider of Identity-based
Data Security Services

MY PROBLEM

We required a comprehensive end-to-end security solution to meet the increasing demand for data privacy, ensure access to resources across heterogeneous technology environments, and satisfy rigorous compliance requirements within critical time-to-market deadlines.

SIMPLY SOLVED

Trianz deployed a single identity and security profile across the entire identity management, provisioning, infrastructure, workflow, auditing, reporting and self-service capabilities spectrum. A centralized session management was introduced, including support for idle and session timeouts, and real-time user revocation. Continuous L1, L2 and L3 customer support was also extended.
