

Designing and reengineering of line-of-business (lob) applications for a niche manufacturing company in the uk

About the client: The client is a leading manufacturer and supplier of portable and fixed landfill gas analyzers and biogas analyzers.

~~Business requirements:~~

About the client: The client is a leading manufacturer and supplier of portable and fixed landfill gas analyzers and biogas analyzers.

Business requirements:

- LOB application development for the client's service offerings
- Swift development and delivery of product while accommodating the requirements of the client's customers
- Resolution of defects while ensuring product reliability and integrity

Solution: Considering Cybage's proven strengths in executing projects, its technical expertise, and experience and domain knowledge of Manufacturing Resource Planning, the client decided to engage with us. The objectives of this engagement were as follows:

- Development of new applications to manage specific needs
- Addition of new functional workflows and redesign (for some of them)
- Addition of business validations and redesign (for some of them)
- Resolution of identified defects

Tools and technologies: C#, WinForms, WPF, WCF, QlikView, SAP Business Objects, Flex
