Developing Software Solutions for Industrial and Medical Applications

Challenge:

Infoteam Software needed an automated software test solution to help them meet the functional safety requirements outlined in EN 50128, IEC 61508, and IEC 62304 on various projects.

Solution:

After an extensive evaluation process, the engineering team at infoteam Software chose the VectorCAST Automated Test Platform for its intuitive interface, advanced functionality, and its TÜV SÜD IEC 61508 certification.

Details:

VectorCAST provides a continuous test environment for the development of critical embedded software applications. With VectorCAST, infoteam's engineers are able to meet the functional safety requirements outlined in EN 50128, IEC 61508, and IEC 62304.
