

Ebit Information Systems

About Ebit Information Systems

Ebit Information Systems is a privately held local IT staffing company in Louisville, KY. They were founded in 2005 and have experienced significant growth every year. Ebit specializes in recruiting the best IT professionals for short and long term contract, contract to hire, and direct hire opportunities.

The Challenge

As a growing staffing firm, Ebit Information Systems needed a cost-effective solution that came with features and functionality that would allow their business to scale. Their previous provider charged for individual product offerings, whereas with Avionté, these came at no additional cost. The straw that broke the camel's back, so to speak, was due to their previous ATS provider not offering an Account Manager, leaving Ebit in extensive limbo when it came to billing issues and general account questions. It was time for a change. And so their search began for recruiting software that was mobile-enabled, had integrated job posting, was user-friendly, and most importantly, came with a dedicated and responsive account representative.

The Solution

Ebit found the recruiting software that met all of their needs and fulfilled their ATS wish list in Avionté. From a personal Customer Success Manager to regularly free software upgrades, Avionté had it all. There was also a unique tidbit about Avionté that caught Ebit's eye, Avionté was developed by recruiters, so the team knew they would be using software that had a thorough understanding of their needs. Now their ATS issues are behind them and Ebit can focus on increasing their immense growth.
