

# Enhancing Carbon Accounting at SNCF Through EcoVadis and Sweep Integration

## About the EcoVadis and Sweep Partnership:

Accelerates SNCF's supply chain decarbonization by integrating supplier carbon data from Carbon Action Manager (CAM) into Sweep's carbon accounting platform.

## SNCF Company Profile

Industry  
**Railway Transportation**

Headquarters  
**France**

Size  
**290,000+ employees**

EcoVadis Customer Since : **2016**  
Sweep Customer Since: **2023**

Solution  
**Carbon Action Manager**

## Company Challenges

**Engaging and driving decarbonization** efforts among 39,000+ suppliers **at different maturity levels**

**Difficulty accurately measuring** Scope 3 emissions

**Lack of supplier-specific data** and reliance on industry averages

Improving **decision-making** in procurement with better **carbon insights**

## How the Partnership Helps

Assesses **supplier carbon maturity, collects primary emissions data**, and equips organizations **with tools and resources** to engage both strategic and at-risk suppliers

Enables **real-time calculation of SNCF's carbon footprint** by integrating supplier-specific data from CAM through Sweep

**Delivers enhanced accuracy and granularity** for Scope 3 calculations by leveraging supplier-level carbon data

Supports **supplier benchmarking, drives smarter procurement decisions, and defines carbon criteria in RFPs** through seamless data integration

## Results

Direct integration of primary carbon data for **3,000 suppliers** collected by CAM into Sweep

**Reduced burden of suppliers reporting in different systems** and improves workflow efficiency

**Time and cost savings**, increased reliability and traceability

EcoVadis provides primary data and supports supplier risk and maturity, while Sweep helps us manage the carbon footprint, tackling carbon from complementary angles.

**Yann Mazloum**  
Director of decarbonization and circular economy of procurement, SNCF
