OVERVIEW

T&T Electrical Contractors, Inc. has proudly served Connecticut for over 40 years. Founded in 1984 by Tony Conaci and Tom Beaudoin with just one van and a focus on residential service work, the company has grown into one of the largest open-shop electrical contractors in the state.

BACKGROUND

Today, T&T operates a fleet of more than 50 vehicles and employs over 85 field personnel, in addition to a full team of project managers, estimators, and prefab specialists.

With deep roots in workforce development and a longstanding commitment to apprenticeship training, T&T has evolved into a multi-million-dollar enterprise, delivering high-quality electrical solutions across commercial, industrial, and public projects.

As the company scaled, so did the complexity of its operations which prompted the need for a more connected, data-driven approach to fabrication. And that's where **EVOLVE Shop** came in.

THE ROOT CAUSE

Before EVOLVE Shop, T&T's fabrication process was disjointed and difficult to manage.

- Work orders were distributed on paper
- Excel was the default tracking method
- Production visibility was practically nonexistent
- Quality control issues stemmed from outdated or incorrect drawings

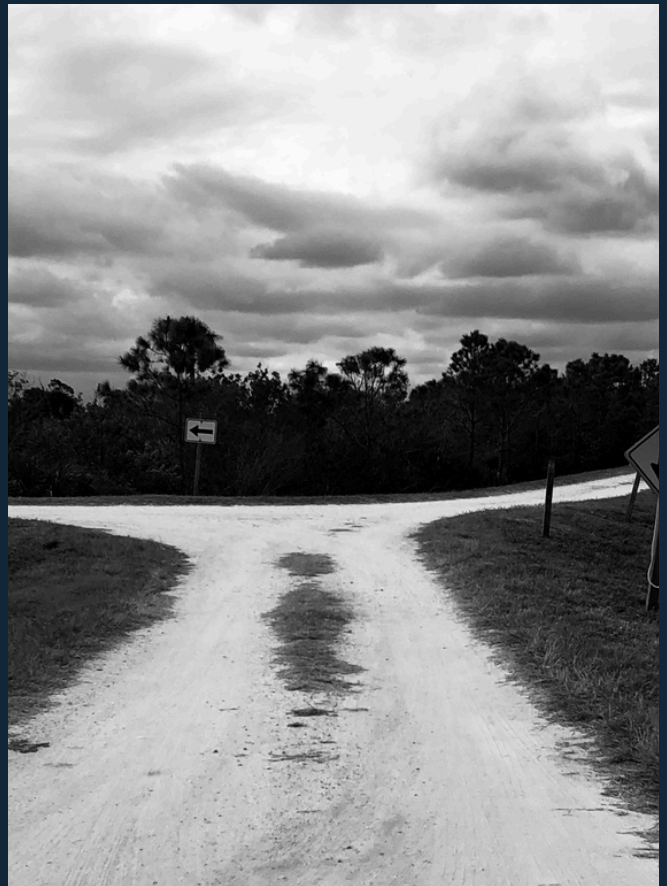

As Steve King, Director of Innovation, explained, "It was disruptive to the workplace..." In other words, they had no ability to collect meaningful data.

THE CROSSROADS

T&T needed a digital solution that could support real-time collaboration and visibility across design and shop teams. But it also had to be easy to implement and simple for everyone to use, especially the fabrication team on the floor.

"We needed something simple but effective. And that's where EVOLVE Shop really kinda checks the box for that." Steve King, Director of Innovation, T&T Electrical Contractors Inc.

The team evaluated their needs and committed to rolling it out.

A NEW WAY FORWARD

Since implementing EVOLVE Shop, T&T has:

- Introduced digital workstations across shop work cells
- Enabled their design team to publish build drawings directly to the shop
- Achieved a 95% reduction in paper-based workflows
- Gained full visibility into task-level progress and production metrics

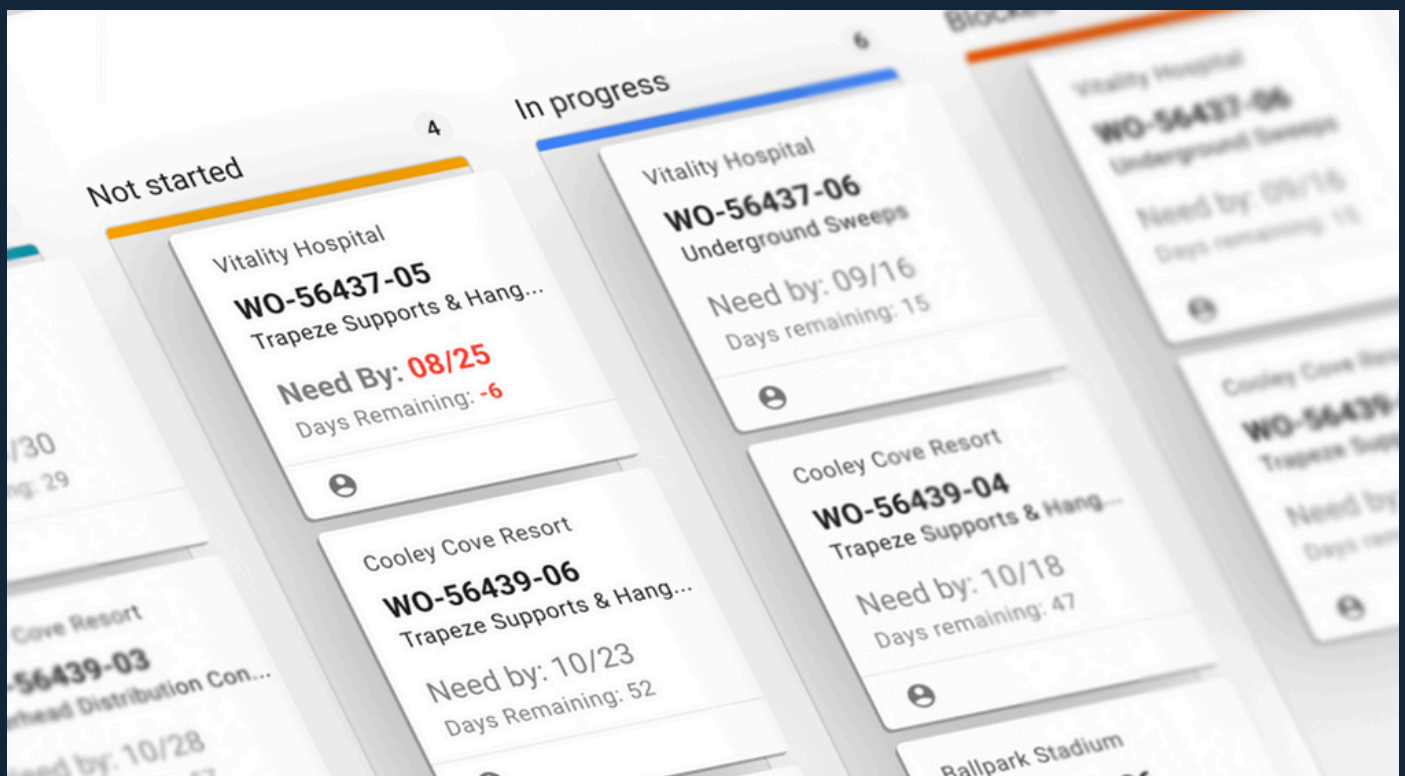

The onboarding process took just a few short calls. Despite concerns about changing shop floor habits, adoption was smooth thanks to EVOLVE Shop's intuitive design.

“

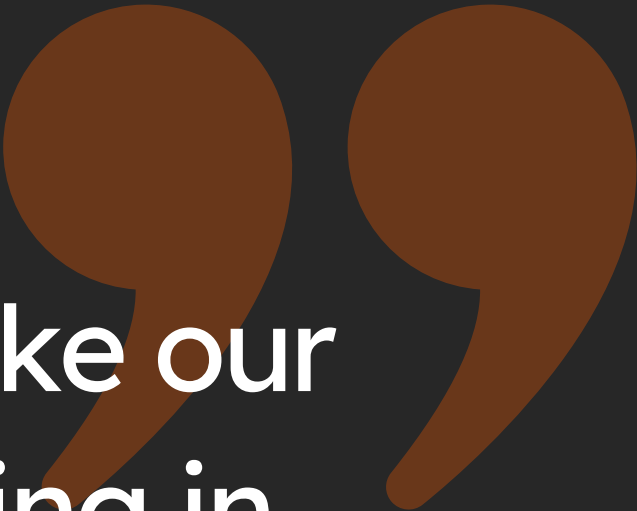

Yeah, it's transformational... And it's been easy for us to implement, actually easier than I had expected,” says King.

CONTINUED SUCCESS WITH EVOLVE

T&T's shop floor operators now interact with the platform directly: accessing work orders, executing tasks, and delivering consistent, quality results. The system supports their standards while allowing flexibility for project-specific needs.

What once required manual tracking and endless paper has been replaced by a connected, trackable, and efficient digital ecosystem.

We don't make our
money working in
software, right? We
make our money
installing electrical
work... and that's what
we gain from using
EVOLVE Shop.

Steve King

Director of Innovation, T&T Electrical Contractors Inc.

MOVING FORWARD

T&T has big plans for the future:

- A new, larger fabrication facility
- An expanded design team
- Greater investment in digital tools that support automation and standardization

Their partnership with EVOLVE Shop will continue to grow alongside them.

TESTIMONIAL

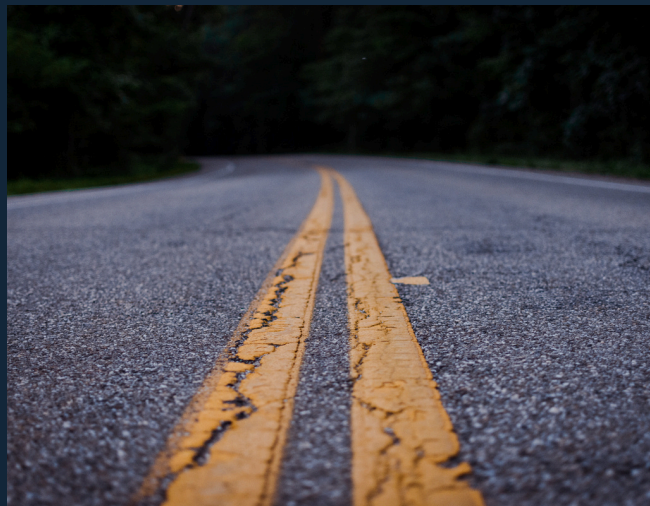

“EVOLVE Shop has eliminated our Excel- and paper-based workflows. I couldn’t get them out of here fast enough.”

STEVE KING, DIRECTOR OF INNOVATION, T&T ELECTRICAL CONTRACTORS INC.
